PROFESSIONAL SUMMARY

Senior QA Automation Engineer with **5+ years of experience** delivering quality across **enterprise web applications** and **service-based applications** through **automation-first testing approaches**. Strong background in **UI automation**, **API automation**, **backend validation**, **release readiness**, **hotfix verification**, and **cross-functional collaboration** within **Agile Scrum teams**. Currently working on **AI-powered chatbot testing** involving **multi-agent workflow validation**, **dataset-based response verification**, **semantic comparison**, and **JSON response validation** across **UI** and **backend layers**. Known for owning **release quality**, improving **automation coverage**, mentoring **junior QA engineers**, and supporting reliable delivery through **continuous testing practices**.

WORK EXPERIENCE

QA Automation Engineer, NielsenIQ Jul 2023 – present

- Built and maintained **automation solutions** across **UI**, **API**, and **backend validation** layers for **enterprise applications**.
- Improved **test coverage** and reduced **manual validation effort** to support stable and reliable **release cycles**.
- Worked on an internal **AI-powered chatbot platform**, validating **multi-agent workflows** through **UI** and **backend testing** approaches.
- Performed **expected-vs-actual response validation** using **golden datasets** and **semantic comparison techniques**.
- Automated validation of **AI-generated JSON responses** to verify **correctness** and **business rule compliance**.
- Integrated automated checks into **Azure DevOps pipelines** to support **continuous testing** and **release validation**.
- Took ownership of **release readiness**, **hotfix verification**, and **post-deployment validation** activities.
- Performed **backend data validation** using **MongoDB** and collaborated closely with **developers** and **product stakeholders** in **Scrum ceremonies**.
- Guided **junior QA engineers** on **automation implementation**, **debugging approaches**, and **testing best practices**.
- Used **GitHub Copilot** to accelerate **test script development** and **test design** activities.

QA Engineer, Accenture Dec 2020 – Jul 2023 | Pune, India

- Developed and maintained **automated test coverage** using **Selenium WebDriver**, **TestNG**, **SpecFlow**, and **Cucumber**.
- Executed **functional**, **regression**, **smoke**, and **manual testing** across **QA**, **UAT**, and **production environments**.
- Worked with **Sitecore CMS** for **test data setup** and **personalization validation** using **Adobe Target**.
- Supported **GDPR compliance testing** and **analytics migration validation** from **Google Analytics** to **Adobe Analytics**.
